EMPLOYMENT HISTORY

Full Stack Engineer/Junior Product Owner

ezyVet | 2018 - Present

I am currently working within a scrum team to deliver features and projects, diagnose and resolve system glitches, write internal integrations, rectify slow performance and refactor legacy code. These are a few of my day to day responsibilities.

Besides these development tasks, I scope and refine projects in preparation for engineering, contact clients directly to gain feedback on prototypes and deliver weekly product updates. In addition to this, I help with grooming the backlog and enforce processes to achieve business goals.

Software Development Intern

Foodstuffs North Island | 2017 - 2018

I worked with the Online Service team to refine and deliver both features and bugs for a variety of their services. These included minor enhancements to their iShop mobile application, writing unit and e2e tests and taking part in daily standups, retrospectives and demonstrations.

ACADEMIC PROFILE

The University of Waikato

Bachelor of Computing and Mathematical Sciences with Honours (2014 - 2018)
